Focus energy into all levels of the body and its surrounding energy fields to ensure perfect connection with Universal Intelligence. • Ensure all interactions between the body's Subtle Organizing Energy Fields lead to the harmonization. Revitalize all foods and drinks consumed to their optimum energetic state, overriding the effects of cooking, processing, storage, freezing, genetic modification, pesticides and fertilizers. • Remove all interference from consciousness that is blocking the flow of energy into the body and its various energy fields. • Ensure all bifurcation points within the body's Subtle Organizing Energy Fields (i.e. the moment when they temporarily collapse and reform) have sufficient energy available to re-establish themselves at the optimum level of vitality and the highest level of order.
