

## **GHOSTS IN OUR QI?**

The Chinese considered points, or acupoints, to be like caves, or dens, of powerful energy. These points could be manipulated and served as pathways for the elimination of disease. With that in mind, here are the 11 Ghost Points- any time you see this theme, or any of the specific points in a scan, you'll get an idea of what is being referred to-

GV 26- this deals with a "ghost" in the ancestral- both direct family but also human race inheritance

GV 23- this is about embracing self. The "ghost" has taken over this point to access the pituitary gland. Phlegm begins to block internal pathways- when you see "phlegm" in the scans, it is often referring to pituitary stress.

GV 16- "ghost" gains access to the brain. This can impact flexibility, ability to change

CV 24 – deals with one's ability to appreciate what they have. The "ghost" brings on negativity regarding this

LU 11- the "ghost" causes one to be absorbed with the world- instead of what IS

LI 11- this is where the false idea "I am at the mercy of others all the time" may originate

PC 7- "ghost" is at the pericardium, trying to get into the heart. This is where intense desire for material objects comes into play

PC 8- "ghost" makes one become self- destructive, because the person doesn't know who they are and is not embracing their resources (the infinite possibilities all around them.)

ST 6- at this point the person is fully embraced by the "ghost"- no ability to handle life

BL 62- you believe the same thing and walk the same path as the "ghost"

SP 1- disoriented, has lost SELF
