

Resolving the confusion about the Find Options:

There are two interpretations to how to use the Find Options:

- A: Use the highest number displayed
- B: Use the lowest numbers displayed

Here is what was at the start of the SRC and what is now.  
New ways to see this features will make it necessary to change it.  
GMD and I will discuss how the change will be made.

- A: The old way:  
Search for what you think is wrong and find supporting energies to the Open Box (Supporting Side)  
The higher the number the more support you add.
- B: The new way:  
Search for what you think is wrong and see if you are on target.  
The lower the number the closer you are to the target Issue. (0 being the target)  
Now this should be added to the Theme Box (Issue Side).

As per GMD:  
Ignore everything above 3000  
3000 to 1000 mildly relevant  
1000 to 500 moderate relevant  
500 to 300 very relevant  
300 to 1 extremely relevant  
0 is the Zero point right on target.
